

Butterfly Milkweed - *Asclepias tuberosa*

- Height: 2 feet - Width: 1-2 feet
- Growth: Upright Wildflower - Taproot
- Flowers: June & July - Color: Orange
- Native: Kansas & Missouri
- Sun: Full to Partial Sun
- Soil: Dry to Medium
- Wildlife Benefit: Nectar Source & Larval Host Plant for Monarch Butterfly

Purple Milkweed - *Asclepias purpurascens*

- Height: 3-4 feet - Width: 1-2 feet
- Growth: Upright Wildflower - Rhizomatic Roots
- Flowers: June & July - Color: Pinkish Purple
- Native: Kansas & Missouri
- Sun: Full to Partial Sun
- Soil: Dry to Medium
- Wildlife Benefit: Nectar Source & Larval Host Plant for Monarch Butterfly

Swamp Milkweed - *Asclepias incarnata*

- Height: 3-4 feet - Width: 1-2 feet
- Growth: Upright Wildflower - Fibrous Roots
- Flowers: July & August - Color: Pink
- Native: Kansas & Missouri
- Sun: Full to Partial Sun
- Soil: Medium to Wet
- Wildlife Benefit: Nectar Source & Larval Host Plant for Monarch Butterfly

Blue Sage - *Salvia azurea*

- Height: 4-5 feet - Width: 1-2 feet
- Growth: Upright Wildflower - Taproot
- Flowers: August & September - Color: Light Blue
- Native: Kansas & Missouri
- Sun: Full to Partial Sun
- Soil: Dry to Medium
- Wildlife Benefit: Nectar Source for Pollinators

Columbine - *Aquilegia canadensis*

- Height: 1-2 feet - Width: 1 foot
- Growth: Upright Wildflower - Taproot
- Flowers: April & May - Color: Red/Orange & Yellow
- Native: Kansas & Missouri
- Sun: Full Sun to Shade
- Soil: Dry to Medium
- Wildlife Benefit: Nectar Source for Pollinators & Hummingbirds

Culver's Root - *Veronicastrum virginicum*

- Height: 4-5 feet - Width: 2-3 feet
- Growth: Upright Wildflower - Fibrous Roots
- Flowers: June, July, & August - Color: White
- Native: Kansas & Missouri
- Sun: Full to Partial Sun
- Soil: Medium to Wet
- Wildlife Benefit: Nectar Source for Pollinators

Marsh Blazing Star - *Liatris spicata*

- Height: 4-5 feet - Width: 1-2 feet
- Growth: Upright Wildflower - Corm
- Flowers: July, August, & September - Color: Purple
- Native: Iowa & Missouri
- Sun: Full to Partial Sun
- Soil: Medium to Wet
- Wildlife Benefit: Nectar & Seed for Birds

Orange Coneflower - *Rudbeckia fulgida* var. *umbrosa*

- Height: 2-3 feet - Width: 1-2 feet
- Growth: Upright Wildflower - Fibrous Roots
- Flowers: July & August - Color: Golden Yellow
- Native: Kansas & Missouri
- Sun: Full to Partial Sun
- Soil: Dry to Medium
- Wildlife Benefit: Nectar Source for Pollinators & Seed for Birds

Purple Coneflower - *Echinacea purpurea*

- Height: 3-4 feet - Width: 1-2 feet
- Growth: Upright Wildflower - Fibrous Roots
- Flowers: June, July, & August - Color: Lavender Purple
- Native: Kansas & Missouri
- Sun: Full to Partial Sun
- Soil: Dry to Medium to Wet
- Wildlife Benefit: Nectar, Seed for Birds, & Larval Host for Ottoe Skipper

Showy Goldenrod - *Solidago speciosa*

- Height: 4-5 feet - Width: 2-3 feet
- Growth: Upright Wildflower - Fibrous Roots
- Flowers: September & October - Color: Yellow
- Native: Kansas & Missouri
- Sun: Full to Partial Sun
- Soil: Dry to Medium
- Wildlife Benefit: Nectar Source for Pollinators & Seed for Birds

Stiff Goldenrod - *Solidago rigida*

- Height: 3-5 feet - Width: 1-2 feet
- Growth: Upright Wildflower - Fibrous Roots
- Flowers: September & October - Color: Yellow
- Native: Kansas & Missouri
- Sun: Full to Partial Sun
- Soil: Dry to Medium
- Wildlife Benefit: Nectar Source for Pollinators & Seed for Birds
